

Great Outdoors

Dr. Hellge – Period 3

The great outdoors can best be experienced in the 58 National Parks in the US or the National Parks in Cuba. Therefore this class will start out with the **history** of the American National Park system and **explore the nature, characteristics and importance** of the oldest to the newest National Park.

Further the class will cover the subject of survival in the great outdoors. We will talk about gear and safety as well as rescue operations.

There is the possibility to include a trip into the outdoors into the curriculum to manifest the knowledge acquired in the classroom.

This class will be graded on research projects, presentation of projects, quizzes and tests.
